Surya V A
surya24@gmail.com

Here is a concise yet comprehensive summary of the resume in 2-3 paragraphs:
Overview Surya V A is an Automation Testing Engineer with 3+ years of hands-on experience in software testing, including automation testing, manual testing, and agile methodologies. He has worked on various testing tools and frameworks, including Selenium WebDriver, TestNG, Cucumber BDD, and Maven. With a strong foundation in Core Java, Surya has expertise in all stages of testing, including SDLC, STLC, and Agile Methodology.
Professional Experience Surya has worked on multiple projects, including CKYC (Centralized Know Your Customer) and GRH (Global Rental Hub). In his current role, he has secured over 30 successful product releases, tested web applications for 40 clients, and created and maintained automation scripts using Selenium WebDriver with Java, reducing manual efforts by 75%. Previously, he worked on a property booking and management portal, implementing automated regression tests with Selenium, which reduced regression suite execution time by 40%. He has also performed manual testing on multiple applications, reporting over 700 issues.
Key Achievements Surya has achieved significant improvements in testing efficiency and quality. He designed automated test scripts in Selenium, reducing manual testing effort by 80% and post-release defects by 30%. His experience in automation test suite optimization has enabled him to develop and maintain test cases for automated unit testing. With a strong educational background in Computer Science (BEng)
