METRIC	SCORE	VERDICT
RAGAS	0.7222	HIGH

EXPLANATION

Precision=1.00, Recall=0.67, Faith=0.50 | Faithfulness: The score is 0.50 because there are no apparent contradictions, suggesting a moderate level of faithfulness, but room for improvement exists. | Context Precision: The score is 1.00 because all nodes in retrieval contexts are relevant, and they are ranked at the top, indicating perfect precision. | Context Recall: The score is 0.67 because 2 out of 3 sentences in the expected output ('Bahubali is the king' from node 1 in retrieval context, 'Bahubali protects people' from node 2 in retrieval context) match with the nodes in retrieval context, but 'Bahubali kills bhallaladeva' remains unaccounted for.
